

OUR CHANGING WORLD

Gannets Y5/6

Miss Hodges, Mrs Blair & Miss Bulman

As a community of faith we will be:

Investigate religious expression in all its diversity, considering different ways of expressing belief through a range of actions. We will explain the significance of key teachings of faith founders, describing the teachings of key religious figures.

As authors, poets and readers we will be:

We will be enjoying and reading a wide range of texts such as 'Kensuke's kingdom', 'Greta's story: the school girl who went on strike to save the planet' and 'running wild'.

We will be using our SPaG knowledge built over the autumn term to write for a range of purposes. We will be writing a diary entry from the perspective of Michael from Kensuke's kingdom. We will be writing letters to the government expressing our concerns about climate change.

As historians and geographers we will be:

Be exploring our changing world. We will be exploring different climate zones, Biomes and vegetation belts.

We will be taking walks around our local community to explore the changes to our coast through weathering and erosion.

We will be exploring climate change and what that means for our world.

As Scientists we will be:

Investigating living things and their habitats. We will be creating the life-cycle of mammals and comparing these to other species such as amphibians, reptiles and birds.

We will be classifying animals and plants based on their characteristics.

We will be exploring the linear classification process and using this to classify things in our local environment.

We will be looking at identifying different microorganisms.

As mathematicians we will be:

Learning our times tables by heart, working with decimals, percentages and fractions. We will also be exploring different measurements and converting between them.

We will be continuing to practice mental calculations and using a range of written calculations when solving problems.

As good citizens we will be:

Be thinking about our courage and perseverance. We will be exploring the world around us and what it feels like to be part of a community.

As active kids we will be:

We will be improving coordination, ball skills and game tactics through hockey sessions.

We will be improving balance and coordination through dance sessions.

As musicians we will be:

Singing in harmony, learning about different chords and performing music.

We will also be continuing to learn how to play tunes on a glockenspiel and recorders.

As artists and designers we will be:

Appreciating our natural surroundings by creating various landscape drawings and paintings. We will be exploring with watercolours and different painting techniques.

Linking with our science topic, living things and their habitats, we will be designing and creating automated animals.
